## Activity category reporting compliance made easy.

**Atrax Group's Weightrax weighbridge reporting software makes it easy for disposal facility operators to meet their waste data reporting requirements with a customisable Activity Source Reporting Module, available now.**

Effective from 1 July 2024, waste disposal facility operators, including transfer stations and landfills, are required to record and report on the activity category of the materials their facility receives.

These seven activity categories are:

1. Construction and Demolition
2. Heavy Industrial
3. Mixed Industrial, Commercial, and Institutional
4. Residential Kerbside Collection
5. Residential Drop-off
6. Unusual Activity. Used only as an exception to capture waste that does not fit into the other categories.
7. Transfer Station – mixed activities. Waste or diverted material that enters a facility from a transfer station.

At Atrax Group we have been working with businesses and Councils for years already to provide them with the information and reports they need to meet their reporting obligations. We have created the Weightrax Activity Source Reporting Module to help you meet the new waste data reporting regulations.

You can always be sure that when you use our Weightrax weighbridge reporting software to record and report your disposal activity, you will comply with any government requirements and obligations.

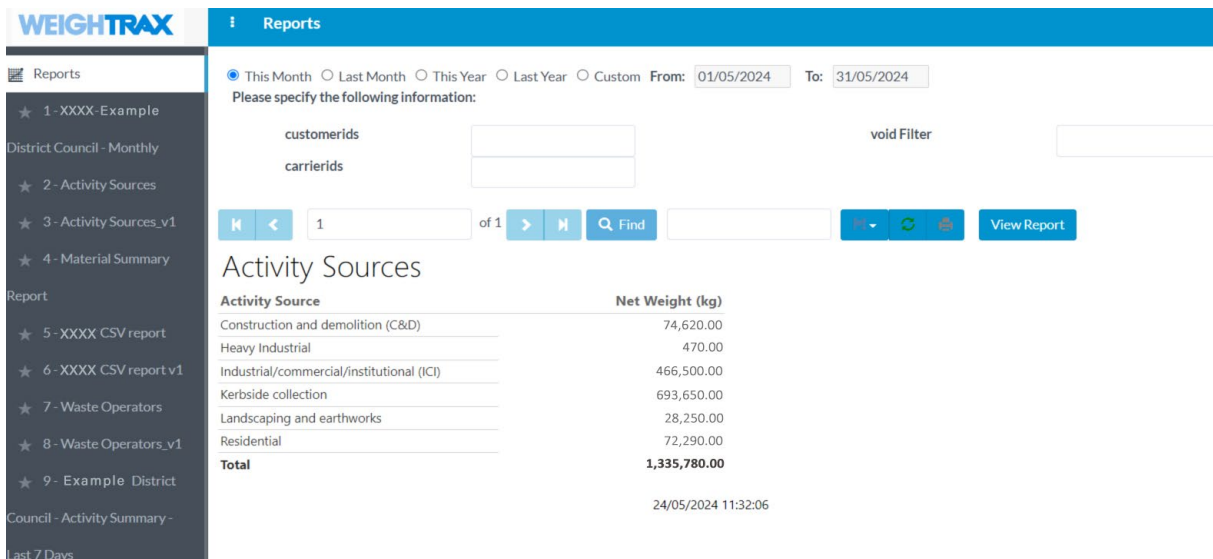

**ATRAX** Atrax Group - the proven choice.

Weightrax is part of the Atrax Group. New Zealand owned, we have been in the business for over 35 years. Atrax Group is the largest manufacturer of scales and systems in the southern hemisphere. - ✔ Simple and accurate
- ✔ Reliable
- ✔ Compliant

Sample Activity Source Report using anonymised data.

## The Weightrax Activity Source Report:

- Accurately captures all the required categories and displays the information simply and clearly.
- Can be customised to fit your organisation's specific reporting requirements.
- Can be drilled into to show different material types under each category. For example, under Construction and Demolition, you could break this down further into Demolition, Construction, Greenfield Soil, etc.
- Can be generated for specific set or custom time periods – monthly, yearly, weekly, daily etc.
- Is available now and can be added to existing Weightrax Software instances - note that extra fees apply. Refer to the accompanying flyer for more information, or get in touch with us.

**If you are an existing Weightrax Software user and would like to add this new reporting module, talk to your regular Atrax contact person. If you would like to know more about the Activity Source Reporting Module, change your existing weighbridge software, or implement Weightrax Software in your organisation, we'd love to talk to you and give you a demonstration. Get in touch with one of our friendly sales team today.**
